

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ADVERTISEMENT.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed, to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion,

as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

ADJUDICATION of the MEDALS of the ROYAL SOCIETY by His
ROYAL HIGHNESS the PRESIDENT and COUNCIL.

A Copley Medal, for the year 1832, to MICHAEL FARADAY, Esq. D.C.L. F.R.S. Fullerian Professor of Chemistry in the Royal Institution of Great Britain, for his discovery of Magneto-Electricity, as explained by him in his “ Experimental Researches in Electricity,” first and second series, published in the Philosophical Transactions for the year 1832.

A Copley Medal, for the year 1832, to the Baron SIMEON DENIS POISSON, of Paris, Foreign Member of the Royal Society, for his Work, entitled, “ Nouvelle Théorie de l'Action Capillaire.”

The Rumford Medal, for the biennial period ending in the year 1832, to JOHN FREDERIC DANIELL, Esq. F.R.S. Professor of Chemistry in King's College, London, for his paper, entitled, “ Further Experiments with a new Register Pyrometer, for measuring the Expansion of Solids,” published in the Philosophical Transactions for the year 1831.

The Royal Medal, in the department of Astronomy, for the year 1833, to Sir JOHN FREDERICK WILLIAM HERSCHEL, K.H. F.R.S., for his paper, “ On the Investigation of the Orbits of Revolving Double Stars,” inserted in the fifth volume of the Memoirs of the Royal Astronomical Society of London.

The Royal Medal, in the department of Physiology, for the year 1833, to Professor AUGUSTE PYRAME DE CANDOLLE, of Geneva, Foreign Member of the Royal Society, for his discoveries and investigations in vegetable physiology, as detailed in his Work, entitled, “ Physiologie Végétale,” and published in the year 1832.
